DESCRIBE THE PRESENT AND ORIGINAL (If known) PHYSICAL APPEARANCE

This rowhouse is the first of a unit of five in the middle of the block. Its carved greystone contrasts with the carved brownstone at 1211 just described, although its facade is otherwise similar. A shared alley separates these two buildings. #1213 is $3\frac{1}{2}$ stories high and 3 bays wide, bays being symmetrical and properly scaled on all floors. Marble steps flanked by brass railings lead to a stoop, rectangular doorway with transom, and vestibule.

A rounded bay includes the first two stories. Windows are double-hung, one over one, and , on the first and second stories, there is within the rounded bay the central window flanked on either side by narrower windows. On the first story each window is surmounted by a one section, bevelled glass light.

Lintels and sills are equally of stone, lintels in this case being flat.

The mansard roof is interrupted by a gable, punctuated by a circular window.
